

PLASMACUTTER CARTRIDGE FILTERING UNIT

Equip your Plasmacutter with a filtering unit to achieve a clean environment in your workshop and to ensure that the dust emissions are always guaranteed $< 2 \text{ mg/m}^3$.

The perfectly filtered air could be ejected in the working area (in accordance with the local regulations) or directed into an exhaust chimney.

The filtering unit prevents dust and metal particles to be exposed to the surrounding environment and thus contributes to an ecological responsible working approach while ensuring employee-friendly working conditions.

Unique Features

- » Ensures Smoke-Free Environment
- » Produces Clean Air for Employees
- » Energy Saving Friendly

PLASMAFEEDER

Equip your workshop with a Spiro® Plasma Feeder.

Use the Plasma Feeder to increase your productivity and save material. Supply your Plasmacutter directly from a coil line (2 or 4 decoilers), including sheet selector!

Unique Features

- » Increase your Productivity
- » Save Material
- » Comes with 2 or 4 Decoilers
- » Includes Sheet Selector
